

talon™ for *Blackberry*

Talon for Blackberry allows users to access the most commonly used queries from their Blackberry device, quickly providing secure information. Talon for Blackberry is an ideal solution for drug enforcement personnel; undercover agents; and the marine, foot, and bike patrol forces.

Access data from the state system, local and regional databases, along with Michigan driver's license images.

Features

- * Common queries – Person, Plate, VIN, Alpha Vehicle, Boats, and Guns
- * View images retrieved from TalonPoints, including Michigan driver's license photos
- * Regional data sharing participation
- * Query data from multiple sources using standard queries
- * User friendly interface
- * NCIC compliant
- * Role based security ensures only authorized personnel access sensitive data
- * Extensive auditing capabilities guarantees proper system usage

Benefits

- * FIPS 140-2 validated 256-bit data encryption and two factor authentication ensures sensitive data is protected
- * Officers have immediate access to information about the individuals they are in contact with, including driver's license images
- * Increased safety for officers and public
- * Extendable
- * Cost and time savings
- * Stay in control of situations
