

# talon™ MDC

Talon MDC is a supplement to dispatch and a tailored version of Talon Desktop, designed for patrol car computers. It incorporates all the technology elements you need for the law enforcement in-car environment. Talon MDC includes an interface to your CAD system, the State of Michigan system, and car-to-car messaging. Created specifically for patrol officers, Talon MDC has a modified feature set such as night mode and a user interface intended for touch screens.

Core Technology's criminal justice software solutions, such as Talon MDC, help improve officer and public safety by presenting useful data to assist them in making informed decisions, quickly and easily.

## Features

- \* Participate in regional data sharing
- \* Data is formatted specifically for in-car use
- \* View images retrieved from TalonPoints; including Michigan driver's license photos
- \* Query data from multiple sources using standard queries
- \* User-friendly interface
- \* Built-in car-to-car messaging
- \* Traffic-stop form performs Person, Plate, OLN, or VIN query from a single form
- \* Day/Night mode
- \* Customize the program appearance
- \* NCIC compliant
- \* Only authorized personnel can access sensitive data
- \* Extensive auditing capabilities to ensure proper system usage

## Benefits

- \* 256-bit data encryption and two factor authentication
- \* Officers receive as much information as about individuals
- \* Built-in messaging aids in mobilizing and responding effectively
- \* Reuse existing systems without costly changes when participating in information sharing

## Talon MDC

- Offers FIPS 140-2 validated 256-bit data encryption and two factor authentication to ensure your sensitive data is protected
- Provides access to local, state, and federal data
- Provides access to driver's license images

## Talon MDC with TalonPoint

- Provides in-car users access to real-time law enforcement data sharing
- Allows agencies to query a variety of databases; results are sent to Talon MDC
- Existing data elements are transformed into a GJXDM compliant format
- Works from the agency's existing system
- View driver's license and mug shot photos

## Talon MDC CAD

- Provides an interface to CAD systems
- Provides CAD features such as Dispatch Notification, Unit Status, Incident Handling, Reports, and shortcut buttons

## Talon MDC Car-to-Car Messaging

- Instant Messaging over a secure network
- Network may be limited to a single agency or to several agencies in a specific region
- Share information with other in-car officers when radio networks are busy or privacy is required
- Review message history through a logging option at the client and server level

## Talon MDC Voice and Ticketing

(In conjunction with **Advanced Public Safety's** [APS] QuickVoice and QuickTicket)

- QuickVoice with Talon MDC speeds up the process of retrieving information from local, state, and NCIC databases
- QuickTicket with Talon MDC significantly reduces the time for writing a ticket

## Talon MDC and Core Service Bureau

- Subscribe to Core Service Bureau to outsource the maintenance and support of software
- NCIC compliant
- Concurrent usage of Talon software
